

Overview

From the beginning of the Internet revolution, United Software Associates has been helping Fortune 1000 companies harness emerging technologies to run their business effectively. We focus on information technology needs of our customers while providing leading edge solutions to them.

What We Do

We build and support your applications by providing customized information technology solutions, which meet your present and future needs. We believe that only people can make the difference and by bringing the "best minds together" we ensure that our customers succeed in their IT efforts. Keeping this simple business philosophy in mind, we deliver information technology solutions in these areas:

- Application Management
- Product Development
- Quality Assurance

How We Do It

Use of three dimensional approach

- Study
- Build
- Improve

Study

Our team works closely with clients to find out what they want to achieve, the best ways to do it and their expectations from United Software Associates. Based on this study, we offer a solution that is best suited for our clients and has the maximum chances of success.

Build

We are always willing to involve ourselves with our client's IT projects at any stage. Our approach is to manage the process of building or maintaining the application in a manner that offers the maximum benefits to our clients by suggesting a combination of on-site, off-site or offshore resources available with United Software Associates.

Improve

We try to optimize the quality, speed and cost of our service at all times. This is one of our unique capabilities and customers who have given us the opportunity to work with them on a long-term basis have always gained from this approach.

Advantages

- Best Customers-speak to them to find out why they like us
- Best People-talk to us and see what we can do for you.
- Best Quality-experience it
- Best Price- you win
