

You always win with us!

United Software Associates is amongst a handful of companies in the world today offering information technology services at highest levels of security and quality.

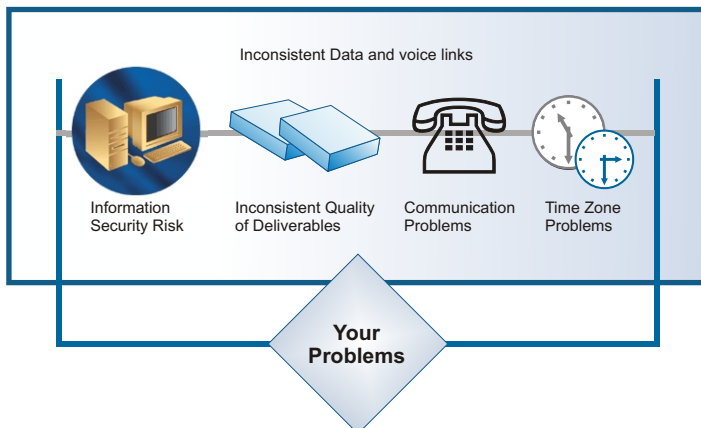

Our consistent track record combined with our internationally certified delivery methodology gives you the peace of mind you deserve while working with us. You can now be assured that your data and intellectual property is safe with us.

Simply put, we have a "No Compromise" policy as far as information security and quality of deliverables are concerned. Our software development center is certified as per ISO/IEC 27001:2005 for Information Security and ISO 9001:2000 for quality.

Your problem

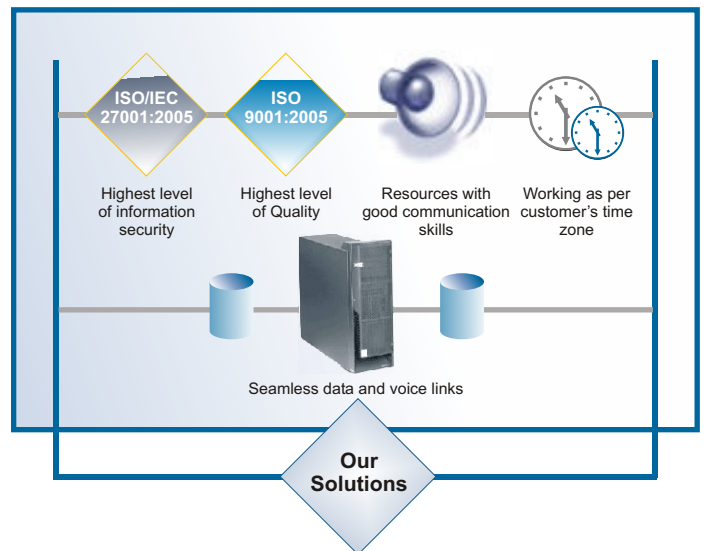

It is a well known fact that in a competitive environment you move work offshore to take advantage of the reduced cost and time to market. But you are always faced with the risk of losing control over your data and intellectual assets since you are dealing with people and facilities in a foreign location. There is also a concern that the quality of deliverables may not be as good as you are used to at your own location. Things get a little more complicated when you add the dimension of dealing with a foreign resource having significant communication problems and most of the time working for you in a different time zone.

Our solution

We make sure that "you always win with us" by maintaining the highest levels of information security and quality,

- By certifying our processes as per **ISO/IEC 27001:2005** Information Security Standard
- By certifying our processes as per **ISO 9001:2005** Quality Standard
- Deploying resources with good communication skills who work as per your time zone
- Implementing seamless data and voice links
